Instructor:

Marketing and business manager in the Molecular Life Science arena with a passion for knowledge transfer and skills development. Skillsets acquired in this field include stakeholder management; conceptualizing, implementation, and management of marketing strategies as Southern African Distributor for Invitrogen (now Thermo Fisher Scientific). Implementation of technical training as a marketing tool and in this capacity hosting numerous workshops across Africa. Conceptualize, design and implement a Foundation in Omics course (Genomics, Proteomics & Bioinformatics) with a flexible, tailor-made wet-lab component. Design of E-learning course, CPD and Royal College of Pathology (UK) accredited. Launched a hybrid, portable "Lab in a Bag" wet-lab genomics course to make training accessible to more remote, under-resourced tertiary institutes in SA and in the rest of Africa, which launched in Accra, Ghana 2019.
